SKILLS

- Programming Languages
  (Python, Java, C/C++, JavaScript)
- Web Development
  (HTML, CSS, JavaScript, PHP)
- Mobile Development
  (Android Studio, Java, Firebase)
- AI & Machine Learning
  (Pandas, NumPy, SHAP)
- Databases
  (MySQL, SQLite, Firebase)
- Tools
  (VS Code, Jupyter Notebook, Figma, Canva, GitHub, Illustrator, Photoshop)

LANGUAGE

English	Fluent
Sinhala	Conversational
Tamil	Native

ABOUT ME

Motivated BSc (Hons) Computer Science (Software Engineering) undergraduate with a completed HND in Computing and currently completing a Diploma in Information Technology. Possesses practical knowledge of software development, web and mobile application development, databases, artificial intelligence, and machine learning.
Experienced in developing academic and personal projects using Python, Java, C/C++, JavaScript, PHP, SQL, Flutter, and modern development tools. Interested in applying software engineering principles to real-world problems and currently seeking an internship or junior-level opportunity to develop professional experience and contribute to software development projects.

EDUCATION

BSc (Hons) Computer Science Specializing in Software Engineering
CINEC CAMPUS (2026-2027) R

Higher National Diploma (HND) in Computing
ESOFT UNI (2023-2025)

Diploma in Information Technology
ESOFT UNI (2023)

G.C.E Advanced Level
KM/KM/AL-ASHRAQ NATIONAL SCHOOL (2020-2022)

G.C.E Ordinary Level
KM/KM/AL-ASHRAQ NATIONAL SCHOOL (2019)

PERSONAL SKILLS

- Problem Solving
- Critical Thinking
- Analytical Thinking
- Logical Thinking
- Teamwork & Collaboration
- Effective Communication
- Time Management
- Adaptability & Flexibility
- Quick Learning
- Leadership
- Responsibility & Reliability
- Continuous Learning
- Research Skills
- Troubleshooting
- Task Prioritization
- Professionalis

PROJECT EXPERIENCE

AI Customer Churn Prediction System
Final-Year / Academic Project
Technologies: Python, Machine Learning, Scikit-learn, XGBoost, SHAP

- Developing an AI-based system for predicting customer churn in e-commerce environments.
- Implemented logistic regression, decision tree, random forest, and XGBoost models.
- Performed customer data preprocessing, feature preparation, and model evaluation.
- Integrated Explainable AI using SHAP to identify factors influencing churn predictions.
- Designed dashboard functionality to present churn risk and support customer-retention decisions.

Android Firebase Chat Application
Technologies: Java, Android Studio, Firebase

- Developed a mobile chat application using Java and Android Studio.
- Integrated Firebase services for application functionality and data handling.
- Designed interfaces for user authentication, messaging and user interaction.
- Gained practical experience with Android development, Gradle configuration and debugging.

My Blog—Offline-First Mobile Application
Technologies: Java, Android Studio, SQLite, Figma

- Designed an offline-first mobile blogging application.
- Implemented functionality for creating, viewing, editing, searching, and deleting posts.
- Applied local database concepts using SQLite.
- Designed application interfaces and prototypes using Figma.
- Created use-case, activity, and class diagrams using UML.
